

Bexhill Twin Sanitary Forcemain SIA

Project Description:

With an identified need to increase sanitary sewage infrastructure capacity in Mississauga, Peel Region initiated the Bexhill Twin Sanitary Forcemain project. The project included construction of two new pump stations, three gravity sewers, and twin sanitary forcemains in the Jack Darling Park / Birchwood Park area. The project also involved the decommissioning of existing infrastructure in Rattray Marsh, a provincially significant wetland.

HSAL was retained to conduct a Social Impact Assessment (SIA). The SIA analyzed open cut construction, the associated effects on the local community and offered recommendations for mitigating impacts.

Client: Region of Peel

Location: Mississauga, Ontario

Year: 2007

Services:

- Social Impact Assessment
