

Darlington Nuclear Generating Station Peer Review

Project Description:

Ontario Power Generation ('OPG') submitted an Environmental Impact Statement and Technical Study Documentation to the Canadian Nuclear Safety Committee for review to determine the type of Environmental Assessment to undertake under the Canadian Environmental Assessment Act. HSAL was retained by the Municipality of Clarington to conduct a peer review of socio-economic and land use studies. Using our proven peer review methodology, we reviewed and provided comments on a number of areas including, community services, infrastructure improvements, employment opportunities and competition for skilled workers, community image, sustainable development, and public involvement and concerns with the project.

HSAL discussed the peer review comments at workshops with OPG and Municipality of Clarington staff and provided a detailed presentation of the peer review team's findings to Clarington Council.

Client: Municipality of Clarington

Location: Clarington, Ontario

Year: 2011

Services:

- Peer Review
- Project Management
