

# Prism Pipeline SEIA

## Project Description:

HSAL was retained by Imperial Oil to complete a Socio-economic Impact assessment ('SEIA') for a proposed pipeline to the Lake Erie refinery. Together with ESGI, HSAL identified socio-economic features within the study area. The description of socio-economic features provided a regional profile of characteristics of the study area.

The purpose of the regional profile was to narrow pipeline route alignments, select a preferred route and focus the analysis on socio-economic features that may be affected by construction and operation of the proposed pipeline. HSAL was also responsible for providing strategic public consultation advice.

**Client:** Imperial Oil

**Location:** Ontario

**Year:** 2001

### Services:

- Socio-economic Impact Assessment
- Strategic Advice
